

BEEF COUNTRY BREEDERS

20th Annual
Sale

Wednesday, December 2, 2009

Midland Bull Test Sale Arena • Columbus, MT

Sale Day Phone 406/ 322-5597 or 406/ 322-9044

Lunch All Day — Sale 12:00 Sharp, starting with Herefords

Cattle Auctioneers: Roger Jacobs & Joe Goggins

Horse Auctioneer: Lynn Weishaar 605/ 866-4670

- Prior to Angus sale Larry Gran of Pfizer will give an update on using and selecting with Genestar MVP DNA Analysis. Larry Gran: 605/ 641-3254

- 120 Coming Two-Year-Old Angus Bulls
- 50 Coming Two-Year-Old Hereford Bulls
- 30 Fall Yearling Angus Bulls
- 25 Coming Two-Year-Old Colts & Fillies

Accommodations

Super 8 Motel 406/ 322-4101 Columbus
Big Sky Motel 406/ 322-4111 Columbus

Health

Health of each herd is excellent. All cattle sold according to State of Montana health regulations. Individual health papers will be furnished for interstate shipment. If your state or province requires additional tests, your purchases will be cared for at buyer's risk and expense until tests are completed.

Trucking

Free delivery on bulls up to 400 miles.

Wintering Arrangements - Angus & South Devon Only

2 year old bulls at \$2.00 per day.

Terms

Terms, conditions and guarantees herein stated in writing shall constitute a binding contract between buyer and seller. Terms of the sale are cash or check payable at the close of the sale and prior to load-out unless other arrangements have been made with the owner in advance. Animals will be sold to the highest bidder with auctioneer settling dispute as to bid. Announcements at the sale by owner or auctioneer will take precedence over statements in the sale catalog or supplement. Each animal becomes the buyer's risk as soon as it is sold, but will be cared for by the seller until load-out or for a reasonable period of time. Everyone attending the sale does so at their own risk and Midland Bull Test Center, Big Country Breeders, or their agents assume no liability, legal or otherwise, for any accidents which may occur. Except for those specifically herein stated in writing, there are no further warranties or guarantees of any nature, expressed or implied.

Guarantee

Every animal in this sale is, to the best of our knowledge, free from any disease or defect. Any known defect will be announced as it enters the ring.

First Breeding Season Guarantee

All bulls selling for \$2000 or more will be covered 50% by seller if they are injured during the first breeding season. Breeding season is defined as the 60 day period following the first turnout of bulls. 50% of the value of the bull up to \$6000 in purchase cost, minus one-half salvage value will be given as credit in a future Big Country Sale or towards a replacement bull if one of equal quality is available by seller. All injured bulls must be diagnosed by a veterinarian. Please notify us as soon as possible should injury occur and prior to the injured bull being sold for salvage. All claims must be made by September 1, 2010. This guarantee does not replace mortality insurance and does not cover loss due to death or other natural occurrence or negligence. Mortality insurance is available sale day.

Mortality Insurance Available through

Wayne - 406-947-2511

Ben - 406-947-2222

We welcome you to our 20th annual Beef Country Bull Sale

Our offering of 50 coming two year old bulls are stout and soggy again this year. We are still using the same ration, the bulls came in from summer pasture in great shape, so we did not start them on a ration until September 15th. Bulls will be semen tested and have scrotal measurements available on sale day.

In visiting with customers these past few months they have all been really pleased with pounds the calves are weighing at weaning time, along with disposition and longevity our bulls are providing. Replacement heifers are good milkers and raising nice calves. We feel this set of bulls will follow in the footsteps of our past bulls.

The bulls are pictured this year before being clipped due to the weather and time constraints. Should you have any questions on any of the bulls please feel free to call.

Sincerely,

The Brillharts
Wayne & Shirlee
Ben

**Call or write for a
DVD of the bulls**

— Understanding Hereford EPDs —

BW (Birth Weight): Derived from the actual birth weight ranking within the contemporary group where the calf was born. The first BW EPD issued for a calf is the average of the dam and the sire, with an adjustment made from that number to reflect the actual birth weight of an individual as compared to its contemporary group average. An actual birth weight that is exceptionally higher or lower than the average of its contemporary group will change that individual's BW EPD accordingly. The BW EPD is primarily changed when progeny have been recorded from the subject animal and the accuracy becomes much higher. The birth weight is adjusted according to the age of dam. The BW EPD has no correlation to an actual birth weight (an 85 lb. calf can have a BW EPD of 4.5 or 5.5 or 6.5 or even a 2.5 in different herds). A lower number is desirable and indicates less expected birth weight.

WW (Weaning Weight): An EPD to measure the growth genetics up to weaning age (205 days). This growth EPD is derived from the weaning weights turned in for contemporary groups. This EPD is generally very indicative of the growth up to weaning age, based on the genetic history of the animals in the pedigree. Actual weaning weights are adjusted for the age of dam. Weaning weights have been taken and recorded more than most any other EPD trait. The accuracy is important to the possible changes of this and all EPDs. The WW EPD has a significant effect on YW EPD as well.

YW (Yearling Weight): An EPD to measure the growth from weaning age to yearling age. The YW EPD is tied to the WW EPD; the growth of the individual through yearling is affected by weaning weight. This EPD will be fairly indicative of the genetics

in the pedigree as we in the industry have taken weaning and yearling weights as actual measurements longer than many traits measured and with fewer adjustments. The accuracy is important to the YW EPD as to the amount of possible fluctuation that may occur.

MM (Maternal Milk): An EPD derived from weaning weight to measure the milking ability of the individual. MM is that part of WW due to a dam's milking ability. A proven bull's milk EPD is derived nearly 100% from his daughters in production. When a bull is born, his MM EPD is the average of his sire and dam. The EPD has low accuracy and will change according to how his sire or dam may change. When his daughters go into production, the way they produce in their contemporary groups, either by being above average or below average, will change the sire's MM EPD accordingly. At this point the accuracy will go up, which gives a truer picture of the bull's actual ability to genetically pass milk to his progeny. A proven cow's milk EPD is derived from her own production and her daughters in production. A cow's own production contributes to less than 50% of her own MM EPD. Her daughters in production contribute over 50% to her own MM EPD. The MM EPD has much more meaning for bulls and cows old enough to have daughters in production.

M&G (Maternal Milk & Growth): This EPD is 1/2 of WW plus MM = M&G. This EPD is sometimes referred to as Total Maternal or Combined Maternal. This is an EPD that reflects the combined WW and MM EPD. It reflects the growth to weaning age plus the milk production to weaning time. It is an estimate of daughters' progeny weaning weight.
