

# BULL CALVES

The 450 bull calves offered in the 2009 Stevenson Genetics Fall Sale are the top end of the natural and embryo calves out of mature cows born at Stevenson Genetics in January and February. Calves out of first calf heifers are held over for our spring sale and calves born in March and April will be sold as long yearlings in the 2010 Fall Production Sale.

These calves were all born and raised in Central Montana near Hobson. The calves in this offering were raised from birth to weaning with no creep. After weaning, the calves are fed a high roughage growing ration. These bull calves were weaned and weighed from September 9<sup>th</sup> – 12<sup>th</sup>.

Complete performance information is provided for each bull. An explanation of the performance information is printed on page 2 of the catalog. These bulls are members of large contemporary groups within the Stevenson Genetics ranches. Because they are grouped by the individual ranch and growing conditions, a ratio of 100 will not necessarily correlate to the same weight between the different groups. These bulls have all tested BVD-PI negative. Current weights on the bull calves will be available sale day.

For buyers wishing to purchase closely related bulls, many full, half and three-quarter brothers are offered in this sale. The sale includes:

32 MONEYMAKER sons along with  
10 sons and grandsons of BOYD ON TARGET 1083

18 sons and grandsons of BASIN MAX 602C

43 grandsons of PAYWEIGHT

56 GAR ULTIMATE sons

31 sons of CE DELUXE along with  
7 FUTURE DIRECTION bred bulls

6 FOCUS bred bulls

13 sons and grandsons of IMAGE MAKER

20 21AR BIG SPREAD 7012A sons

Wintering arrangements are available on bull calves purchased in the sale. For \$250 per head, they will be wintered and delivered after our March bull sale. Wintered bulls will have yearling and ultrasound data collected and recorded to AHIR. They will also pass a complete breeding soundness evaluation, including semen test, prior to delivery in the spring.

While these bulls are guaranteed breeders, we recommend that bulls not wintered at Stevenson Genetics be fertility tested by a certified veterinarian prior to use next summer.

RETAINED INTEREST – we are selling FULL POSSESSION and ½ REVENUE-SHARING INTEREST in every bull in this sale. The bull you purchase is completely in your control regarding how you handle the bull and your natural service use. You receive 100% salvage value of the bull. Retaining ½ revenue-sharing semen interest simply allows Stevenson Genetics the right to share in collection of semen, use of semen in our herds and the right to share in semen sale revenue if semen sales become a possibility.

Realistically, we will collect semen on a very small percentage of the bulls selling. It will be an even smaller number of bulls that will market semen. However, we realize that many promising bulls are identified after they have proven themselves in natural service. If you have any questions or concerns about our retained interest policy, please contact any Stevenson Genetics representative.

A future herd sire, LOT 401 could possibly be the thickest calf at his age we have ever raised. He is the first son of the \$30,000 Midland Test station standout 21AR BIG SPREAD 7012A. The name is fitting for this calf that ratioed 99 BW and 120 WW and is moderate framed and very correct. He also ranks in the lightest 25% of the breed for BW and top 1% for WW and top 3% for YW. LOT 401 is off the charts with a 40.27 \$W index that ranks in the top 1% and a \$F index in the top 15%. His dam that sells as LOT 2 in the elite cow sale is a massive, high volume, deep bodied, easy fleshing cow. Her maternal grandam by RAINMAKER 814Z was also the grandam of the \$14,500 high selling bull in the spring 2006 sale, DIAMOND BENCHMARK 3R65.

One of our favorites, LOT 404 is an obvious herd bull prospect. Ranking number one in his contemporary for WW, LOT 404 offers a great spread for EPDs from an outstanding cow family. He ranks in the top 15% for WW EPD and top 20% for YW EPD. His first three dams record 4 NR 109 2 YR 109, 4 NR 102, 4 YR 108 and 4 NR 109 with 3 YR 104. This IN FOCUS X ON TARGET combination has been extremely successfully resulting in the best of both bloodlines. Several 1/2 brothers have been used in natural service at Stevenson Angus.

LOT 458 is a maternal brother to STEVENSON DUKE 4186, the sire of several bulls represented in the older offering. With proven progeny data, 4186 records a dominating 76 WW EPD and 121 YW EPD. We would expect LOT 458 to offer similar growth potential already ranking in the top 2% for WW EPD and top 5% for YW EPD. Descending from a naturally high performing cow family, his first three dams record 3 NR 115, 1 YR 118 and 3 NR 116, 3 YR 106 and 4 NR 102 with 4 YR 104.

LOT 556 is a powerful cow bull. The commercial cattlemen love this sire group, DIAMOND PAYWEIGHT 738N because they are not too big but add pounds to a calf group because of their muscle and depth of body and as a bonus they left super daughters with good dispositions.
