Dear Friends and Cattle Producers:

It is with great pleasure that we invite you to our 9th Annual Production Sale. We believe you must have a strong maternal cow herd to have true performance. True performance is bred in, not fed on!!!

The summer of 2009 was again busy with a wedding; Billi Jo and Anthony were married on the beach in July. It was a beautiful day. Ali was the cutest little flower girl ever! In November, we all went to Hawaii to spend Thanksgiving with Matt and Lisa. It was a great trip-hard to come back to reality.

As you go through our catalog, you will notice over 50% of the bulls are sired by bulls that we have bred and raised. We believe in our genetics. If a calf doesn't meet our strict standards to be a bull, he gets steered out. It doesn't matter what his pedigree or EPDs are.

We want you to know that these bulls and females are developed by us right here at home. They are raised on a high roughage diet from the day they are born to the day they are delivered to your place. They are not pushed to look good on sale day, they are developed to be breeding bulls and cows. We hope you like our bulls even better as a 2 or 3 year old than the day you purchased them.

Dustin Carter will be our auctioneer as Craig Conover is slowing down and doing fewer sales as he eases into retirement. Dustin has been through our cattle and can answer any questions. Dustin or any of the ringmen listed in the next page can also help. Better yet, we invite everyone to stop by and visit with us and we will personally help you with your needs and answer any questions you may have.

To our past bidders and buyers, we say "Thank you." To the people new to Big Rok Angus, we say "Welcome." You are all invited to a complimentary homemade lunch before the sale starting at 11:30 am.

See you at the Sale!

Kevin and Denise
Billi Jo and Anthony
Kelli, Jason, and Ali
Matt and Lisa

Sale Headquarters

AmericInn — 218/ 847-8795, be sure to ask for the Big Rok discount

Directions to the sale site

From Detroit Lakes, go 3 miles west on Hwy 10 then turn at the Big Rok sign and proceed north for 2 miles or go 3 miles north of Detroit Lakes on Hwy 59 then 1 1/2 miles west and back north 1/2 mile.

Herd Health

Our entire herd is on a strict vaccination program as recommended by Pfizer. Also, our entire cow herd is tested for Johnes, TB and BVD annually. Any positives are immediately removed from the herd, and also their calves. We will continue to test yearly to insure the health of our cow herd. All Big Rok herd bulls are AMF and TB free. Any questions about our herd health may be directed to Dr. Dennis Lange, DVM @ 218/ 439-6600.

A \$25 discount on all bulls picked up on sale day or by Monday, March 8, 2010.

Free feeding through the end of April and free delivery within 200 miles on all bulls selling for \$2500 or more.

For bulls selling under \$2500, we will feed bulls and deliver the end of April for \$100.

Reference Sires

All Big Rok herd bulls including :
 TO 1916 Bandolier 633, Big Rok Ole 450,
 Big Rok Benchmark 610 were
 tested and are AMF and TB Free.

- Great thick bull calf

First Year Breeding Guarantee

All bulls selling for \$2,000 or more will be covered 50% by Big Rok Angus if they are injured during their first breeding season. Breeding season is defined as the 90-day period following the first turnout of the bulls.

50% of the value of the injured bull, minus one-half salvage value, will be given as credit in a future sale toward a replacement bull if one is available. Salvage value, if any, will be split equally between Big Rok Angus and the buyer. Minimum salvage value is \$1,000. All injured bulls must be diagnosed by a veterinarian. Please notify us as soon as possible should injury occur and prior to the injured bull being sold for salvage. All claims must be made by Oct 1, 2009.

Example 1: A \$5,000 bull is injured and will not heal. A credit of \$2,500 minus one-half any salvage value will be given to the buyer.

Example 2: A \$2,000 bull is injured and will not heal. A credit of \$1,000 minus one-half of any salvage value will be given to the buyer.

Example 3: A \$1,750 bull is injured and will not heal. No credit is given. Buyer retains all salvage value.

- Youngest Big Rok Benchmark calf - not even 12 months old
- Will work on heifers

Why good bulls cost more. . .

Nobody wants to spend too much for a bull, but why do some bulls sell for a lot more than others? The answer is very simple—genetics!! A bull from your neighbor or a local sales barn will sire calves just as well as a performance tested bull from a reputable breeder.

Let's look at why a good bull is actually the easiest way to make money in the cattle business. A performance tested bull has had all of the necessary vaccinations, a breeding soundness examination, ultrasounded for carcass traits, weighted 5-6 times before a year old, and is sired by a registered bull out of a registered cow with proven performance records. This in itself is worth a lot of money, but the following formula will help prove my point.

Add the difference in pounds a performance tested bull will add to each calf, multiply by the number of cows bred to him each year, times the number of years you use the bull, times the price per pound of each calf you sell.

Example—Bull adds 25 lbs to each calf and you breed him to 25 cows for 4 years and you average 90¢/lb for your calves. 25lbs x 25 cows x 4 years x 90¢ = \$2250

This shows you can pay \$2250 **more** for a good bull that will improve your cowherd over buying just a bull.

With the future as bright as it looks in the beef industry, these numbers should get only better. If you don't think improvement like this is possible, just look back 20-25 years ago. Most calves being sold at weaning weighed about 450 lbs. Now several of our customers are selling calves weighing 650 to 700 lbs in the fall.

Good bulls aren't an expense, they're an asset!!

- 4 year old herd bull that was top selling bull at 2007 Twin Oaks Angus
- Dam is a beautiful pathfinder daughter of GKAF Rito 837, one of the very top cows in that herd
- We used 633 to clean-up heifers 2 years ago and they calved out fine
- Several of his daughters are out of 1st calf heifers in this sale
- Selling 1/3 interest and full possession
- Big Rok Angus and Twin Oaks Angus will each retain 1/3 interest in order to continue using him AI

- This heifer ties up out two best cow families nVDAR Heather Lass 187 and Big Rok Polly 510
- This female is our program, she is bred Big Rok top and bottom

MATERNAL GENETICS ARE CARCASS GENETICS

We believe that good maternal genetics can be profitable in the feed lot. You do not have give up the maternal traits of the Angus breed to get the carcass traits that so many breeders are chasing. We, at Big Rok, are getting actual data to prove this. In the past year, one of our bull customers, that feed his own calves, has given us the following kill data. Big Rok bulls sired all these calves and the majority of the cows were out of Big Rok genetics.

•Spring/Summer 2009-••341 calves

51 CAB Prime
 18 Prime
 135 CAB Choice
 114 Choice
 23 Select

Fall 2009-•••73 calves

10 CAB Prime
 19 Prime
 9 CAB Choice
 24 Choice
 1 Select

• These 341 calves are the remainders of over 800 calves born in 2008.

•• 60% of these calves graded CAB Prime, Prime, or CAB Choice

••• 52% of these calves graded CAB Prime, Prime, or CAB Choice

95% graded Choice or Better

We also took ten calves to the Minnesota Carcass Merit Program last year and received the following results:

1 Prime
 5 CAB Choice
 4 Choice
 0 Selects

These calves were the calves that did not make the bull pen or the heifer replacement pen.

We will continue to get actual carcass data on our calves and as many offspring out of our genetics as possible. As you can see, Maternal Genetics are Carcass Genetics. You don't have to give up one to get the other.

Big snow April 2008

Scenes from our 2009 sale

— Sale Notes —

The Maternal Herd That Performs
