- SQ Credence 67S
- WC Knockout 702.T
- Windy Ridge Power Point 716

#### **General Information**

**Sale Location:** Western Livestock Auction, Great Falls, Montana. Take I-15 west of Great Falls for approximately 5 miles, then take the Manchester Exit 286. See map page on 41.

**Sale Time:** Saturday, April 9, 2011; 1 p.m. MST.

**Lunch:** Complimentary lunch at 11:30 a.m.

**Lot Numbers:** Ear tags will correspond with numbers in the catalog. Green tags highlight the calving-ease bulls..... those with B.W.  $\leq$  82 lbs. and BEPD  $\leq$  2.5 lbs.

**Bull Development:** All the bulls have been fed at the Lost Lake Ranch Bull Development Center, since the day they were weaned. A high roughage diet is fed, to demonstrate the animal's potential, but they are conditioned to pass it on.

**Fertility Testing:** All bulls have passed exams including reproductive tract physical, scrotal measurements, and semen analysis, by Pat Trindle, DVM.

**Health:** Cattle have all been vaccinated for PI3, IBR, BVD, BRSV, Clostridials, Hemophilus and Pasturella as well as for warts and foot rot. All given Ivomec. All have tested (ear notch) negative for persistent BVD infection. Clint Hilt, DVM of Hilt Veterinary Services is the Lost Lake Ranch herd health advisor.

**Ultrasounding:** All yearling bulls have been "carcass" ultrasounded by Bob Stevenson, a Certified Ultrasound Technician (CUP), Hobson, MT.

**Individual Animal Data:** Extensive data is provided on all registered cattle. All catalog EPDs are current as of catalog press time. Updated EPDs can be viewed online at [www.angus.org](http://www.angus.org). It is provided on the commercial cattle to the extent available. Final weights, ultrasound information and scrotal measures will be available at the sale or at [www.lostlakeranch.com](http://www.lostlakeranch.com)

**Inspection of Cattle:** The cattle are available for your inspection, prior to the sale, at Harrer's Lost Lake Ranch. View all the cattle at Western Livestock Auction on Friday, April 8 and Saturday, April 9.

**Announcements:** Announcements from the auction block take precedence over any printed matter.

**Bids:** Bids can be phoned to any of the ringmen, the auctioneer, or owners. Internet bidding/buying at [www.cattleusa.com](http://www.cattleusa.com) (see page 5 for details).

**Retained Interest:** Lost Lake Ranch and its associates are retaining one-third revenue sharing semen interest on every registered yearling bull selling in this sale. Full possession and full salvage value sells on all bulls.

**Terms and Conditions:** The terms of the sale are cash or check, and all settlements must be made at the close of the auction. All animals are 100% guaranteed in accordance with the rules and regulations set forth by the American Angus Association. A copy of these rules and regulations is printed in the back of this catalog.

**Insurance:** Bull Mortality and Loss-of-Use Insurance coverage will be available through Western States Insurance, with a representative at the sale (see page 5 for details).

**Liability:** All persons who attend the sale do so at their own risk. Neither Lost Lake Ranch, nor the other ranch owners, nor their employees, assume any liability for any accidents which may occur.

**Delivery:** Free delivery with single ranch total purchases of \$2,500 or more, within 350 miles of the sale site; otherwise delivered at cost. \$50 rebate per animal to buyers who pick them up at the sale site within a day of the sale.

**Volume Discounts:** 3 bulls - 3% discount, 4 bulls - 4% discount and continuing on up to 10 or more bulls - 10% discount.

**Wintering:** Free through 5/1/11, then boarded at \$2.00/head/day. Bulls are kept at buyers risk from time of sale.

**Special Thanks:** Special thanks to our families and friends for all their help and support; to Michael (foreman) & Diana Reishus; to all the vendors that Lost Lake Ranch partners with throughout the year; and to all our bidders and buyers!

# IN THE REAL WORLD SALE

March 2010

Dear Cattle Producers:

Please accept this invitation to our Harrer's Lost Lake Ranch 17th Annual "In The Real World Sale"... emphasizing that cattle must be bred and fed to work in the real world.

Wow! What a difference a year makes. Exactly a year ago, my letter concentrated on the economics of recession. Now, we're enjoying high prices in all sectors of the cattle industry. More to the point, there are reasons to have optimistic expectations for the future. Freely translated, this is a good time to be buying bulls and raising cattle.

There are three reasons to be so optimistic:

1. Beef production is forecast to decrease 2 to 2.5 percent in 2011. A positive part of the equation for all of us.
2. With record high cull-bull prices, many average bulls have been sold. This leaves fewer bulls though a higher quality genetic pool of bulls available this spring. Also, salvage value for your old herd bulls has never been higher.
3. Given the future expectations with its prediction for herd expansion, bull prices currently may well be a bargain compared to the future.

In addition to the industry itself, Lost Lake is providing a variety of options and opportunities for our customers (see page 1 for greater detail):

- High quality, healthy cattle, at a non-inflated cost
- Varied genetics to match your herd needs
- Completely fertility tested/proven
- All BVD negative and fully vaccinated
- Complete data provided, including ultrasound
- Volume discounts
- Free delivery and wintering options
- Shared Mortality and Loss-of-Use Insurance
- Video viewing of the bulls; online bidding & buying

This year, our production offering includes 100 yearling bulls (most registered but some very good commercials). Lost Lake Ranch has chosen the top 45% of our bull crop to offer for sale here. There are growth bulls and heifer bulls. The cattle are organized in the catalog by sire groups and "heifer bulls" are those with green ear tags.

We hope you can join us in person or by phone on April 9, 2011, whether looking to buy, just looking, or just visiting. Consider this an invitation!

Sincerely,

Grant & Deanna Harrer

Grant and Deanna Harrer

Welcome to our 17th annual joint production sale with Lost Lake Ranch. It is hard to believe that it has been that many years. Many thanks to our repeat customers and to potential new buyers for having confidence in our bulls and breeding program.

I have been keeping an eye on the market and trends and believed that the future will bring producers to a time of building up their cow herds. This leading to a greater need for bulls to breed to heifers. That time is now. Windy Ridge has 8 bulls in the sale that meet heifer-bull criteria. We also have bulls that will maximize weaning weights from your mature cows.

Studies have shown that birth weight EPD's are 9 times more accurate than raw weights as a selection tool. The birth EPD is a much better indicator of what's in the calf genetically, though his own birth weight has been factored into his birth EPD. Each bull producer has a different method of "weighing" their calves. Weights can only be as accurate as the situation allows. Are you using a scale, a hoof tape, measuring around the girth, and is the Momma cow threatening you with bodily harm at the time? Also the amount of feed the cows are given can influence the weight of the calves. Something else to keep in mind. This calving year we all probably have experienced the fact that lower birth weight calves do not survive as well in frigid temperatures as the 80 to 95 pound calves.

When looking at ratios, such as birth, weaning, and yearling, consider that EPD's are 9 times more accurate than ratios as a selection tool. That is because of the differences in the performance levels between herds and contemporary groups, and numerous factors that can affect any one individual weight. For instance how long did it take to weigh the 150 head? The difference between the first calf and the last calf weighed on a given day can be significant. A final factor to consider is that Windy Ridge runs 50 mother cows which makes our ratios less statistically valid compared to herds of hundreds of contemporaries.

On a personal note I am truly thankful that Grant is making slow but steady improvement after fracturing his hip. He had us worried. I have enjoyed working with Jeff and Kara (Schile) this past year as they are a part of Lost Lake Ranch and Windy Ridge Angus.

Please call with any questions and enjoy the lunch and visiting on sale day.

## **Coverage Summary of Bull Mortality and Loss of Use Insurance Coverage**

The **Harrer's Lost Lake Ranch** has arranged for Western States Insurance Agency to make available Mortality/Loss of Use Coverage for **Harrer's Lost Lake Ranch and Windy Ridge Ranch** bulls sold in the **April 9, 2011** sale.

The Value of the bull is considered to be Purchase Price as listed on the Date of Sale.

We will reimburse as follows:

- **Full Mortality: 100%** of the Value of the bull(s) in the event of death or life-threatening injury;
- **Loss of Use: 80%** of the Value of the bull(s) in the event of Loss of Use from Accident, Injury, or Disease.

The coverage provides traditional, full mortality for death from natural causes and accidental causes including life-threatening injuries. The coverage includes Loss of Use for claims made during the policy term.

The coverage is available on the Date of Sale for those who choose to insure their bull(s). The policy will insure the bull(s) from the **Date of Sale for a period of One Year**. All claims made to the Company require a Veterinarian's certified examination of the animal(s) for which the claim is made. Under the Loss of Use extension of coverage, the animal's inability to naturally service cows must be diagnosed by a Veterinarian, and immediately reported to the Company in writing. A Loss – as defined by the policy – shall occur if after the date of diagnosis and first report, the bull cannot breed due to accident, illness, or disease. Loss of Use claims will be settled as above.

**All this is an abbreviated summation of the actual policy terms and conditions. Please read the entire policy to know how coverage applies.**

**The cost of the coverage is 6% of the Purchase Price for Mortality with Loss of Use.** That amount will be added to the cost of your bull(s) at settlement on the Date of Sale if this insurance is purchased. The sponsoring ranch is paying the other half of the premium to encourage the buyer to purchase the insurance policy.

To be eligible for Loss of Use coverage, a bull must be determined to be a "sound breeder" by passing a breeding-soundness evaluation as outlined by the Society for Theriogenology.

Salvage value – if any – belongs to the OWNER of the bull.

**LIVE CATTLE AUCTIONS**

### **Cattle USA Internet Options**

This year, Lost Lake Ranch has increased the options available to our customers.

Go to [www.cattleusa.com](http://www.cattleusa.com) to

- View our sale catalog on line
- View a live video of each lot prior to the auction.. This provides a non-hurried look at the cattle when it is convenient for you.
- Arrange for bidder / buyer approval to participate in the auction real-time via internet. This provides the option to "make the sale" when you can't really make the sale due to time, expense, or weather.

Please register well before the auction begins.

Contact Western Livestock Auction toll free at 866-727-5401 with any questions.

**EPDs of Sire and Dam**

**Actual Birth Weight:** The actual weight of the calf within 24 hours after birth, measured in pounds.

**205 Day Weight:** The weaning weight of the calf adjusted to a common age of 205 days and adjusted for the age of the dam, measured in pounds.

**205 Day Ratio:** A direct comparison of one calf to all others in his contemporary group. A weaning ratio of 100 is always average. However, some individuals are "average" only because their contemporary group was small.

**Yearling Weight:** Actual weight on 3/2/11, on test, as measured in pounds.

**365 Day Weight:** The weight of the calf taken on 3/2/11, adjusted to a common age of 365 days and adjusted for age of dam, measured in lbs. Some bulls were not of an age that this could be calculated.

**365 Day Ratio:** A direct comparison of one calf to all others in his contemporary group. A yearling ratio of 100 is always average.

**Yearling ADG:** A rate of gain, calculated using the 365 day weight, measured in lbs per day.

**Marbling EPD (Marb):** Expressed as a fraction of the difference in USDA marbling score of a sire's progeny compared to progeny of other sires.

**Ribeye Area EPD (RE):** Expressed in square inches, is a predictor of the difference in ribeye area of a sire's progeny compared to progeny of other sires.

**Fat Thickness EPD (Fat):** Expressed in inches, is a predictor of the differences in external fat thickness at the 12th rib (as measured between the 12th and 13th ribs) of a sire's progeny compared to progeny of other sires.

**Weaned Calf Value (\$W):** An index value expressed in dollars per head, is the expected avg difference in future progeny performance for preweaning merit.

**Feedlot Value (\$F):** An index value expressed in dollars per head, is the expected average difference in future progeny performance for postweaning merit compared to progeny of other sires.

**Grid Value (\$G):** An index value expressed in dollars per head, is the expected avg difference in future progeny performance for carcass grid merit.

**Beef Value (\$B):** An index value expressed in dollars per head, is the expected avg difference in future progeny performance for postweaning and carcass value compared to progeny of other sires.

# sign after pedigree names indicate Pathfinder status of that individual.

**Dam Production:**  
 WR - Weaning Ratio  
 # calves — Avg. Ratio  
 YR - Yearling Ratio  
 # calves — Avg. Ratio

**Birth (BW) EPD:** The birth weight EPD is a predictor of an individual's contribution to its progeny's weight at birth and is a comparison of breed average, measured in pounds.

**Weaning (WW) EPD:** The weaning weight EPD is the amount of increase or decrease in weaning weight you could expect from the progeny of a bull compared to an average bull in the breed for weaning weight, measured in pounds.

**Milk EPD:** The milk EPD is a predictor of a sire's genetic merit for milk and mothering ability expressed in his daughters, measured in pounds. It is that part of weaning weight attributed to milk production.

**Yearling Weight (YW) EPD:** The yearling weight EPD is the amount of increase or decrease in yearling weight one could expect from the progeny of a bull compared to an average bull in the breed for yearling weight, measured in pounds.

**Scrotal EPD:** The scrotal EPD is a predictor of the difference in transmitting ability for scrotal size, measured in centimeters.

# American Angus Association® Selection Tools

**Expected Progeny Difference (EPD)**, is the prediction of how future progeny of each animal are expected to perform relative to the progeny of other animals listed in the database. EPDs are expressed in units of measure for the trait, plus or minus. Interim EPDs may appear on young animals when their performance has yet to be incorporated into the American Angus Association National Cattle Evaluation (NCE) procedures. This EPD will be preceded by an "P", and may or may not include the animal's own performance record for a particular trait, depending on its availability, appropriate contemporary grouping, or data edits needed for NCE.

**Accuracy (ACC)**, is the reliability that can be placed on the EPD. An accuracy of close to 1.0 indicates higher reliability. Accuracy is impacted by the number of progeny and ancestral records included in the analysis.

## GROWTH

**Calving Ease Direct (CED)**, is expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf heifers. It predicts the average difference in ease with which an sire's calves will be born when he is bred to first-calf heifers.

**Birth Weight EPD (BW)**, expressed in pounds, is a predictor of a sire's ability to transmit birth weight to his progeny compared to that of other sires.

**Weaning Weight EPD (WW)**, expressed in pounds, is a predictor of a sire's ability to transmit weaning growth to his progeny compared to that of other sires.

**Yearling Weight EPD (YW)**, expressed in pounds, is a predictor of a sire's ability to transmit yearling growth to his progeny compared to that of other sires.

**Yearling Height EPD (YH)**, is a predictor of a sire's ability to transmit yearling height, expressed in inches, compared to the that of other sires.

**Scrotal Circumference EPD (SC)**, expressed in centimeters, is a predictor of the difference in transmitting ability for scrotal size compared to that of other sires.

## CARCASS

The new carcass EPDs are calculated from an integrated analysis of the Angus Herd Improvement Records (AHIR®) carcass and ultrasound phenotypic databases. The genetic evaluation produces a single set of EPDs for carcass weight, marbling score, Ribeye area and fat thickness. The units of measure are in carcass trait format and analyzed on an age-constant basis.

**Carcass Weight EPD (CW)**, expressed in pounds is a predictor of the differences in hot carcass weight of a sire's progeny compared to progeny of other sires.

**Marbling EPD (Marb)**, expressed as a fraction of the difference in USDA marbling score of a sire's progeny compared to progeny of other sires.

**Ribeye Area EPD (RE)**, expressed in square inches, is a predictor of the difference in ribeye area of a sire's progeny compared to progeny of other sires.

**Fat Thickness EPD (Fat)**, expressed in inches, is a predictor of the differences in external fat thickness at the 12th rib (as measured between the 12th and 13th ribs) of a sire's progeny compared to progeny of other sires.

## MATERNAL

**Calving Ease Maternal (CEM)**, is expressed as a difference in percentage of unassisted births with a higher value indicating greater calving ease in first-calf daughters. It predicts the average ease with which a sire's daughters will calve as first-calf heifers when compared to daughters of other sires.

**Maternal Milk EPD (Milk)**, is a predictor of a sire's genetic merit for milk and mothering ability as expressed in his daughters compared to daughters of other sires. In other words, it is that part of a calf's weaning weight attributed to milk and mothering ability.

**Mature Weight EPD (MW)**, expressed in pounds, is a predictor of the difference in mature weight of daughters of a sire compared to the daughters of other sires.

**Mature Height EPD (MH)**, expressed in inches, is a predictor of the difference in mature height of a sire's daughters compared to daughters of other sires.

**Cow Energy Value (SEN)**, expressed in dollars savings per cow per year, assesses differences in cow energy requirements as an expected dollar savings difference in daughters of sires. A larger value is more favorable when comparing two animals (more dollars saved on feed energy expenses). Components for computing the cow SEN savings difference include lactation energy requirements and energy costs associated with differences in mature cow size.

## \$VALUE INDEXES

**\$Value indexes**, are multi-trait selection indexes to assist beef producers by adding simplicity to genetic selection decisions. \$Values are reported in dollars per head, where a higher value is more favorable. The \$Value is an estimate of how future progeny of each sire are expected to perform, on average, compared to progeny of other sires in the database if the sires were randomly mated to cows and if calves were exposed to the same environment.

**Weaned Calf Value (\$W)**, an index value expressed in dollars per head, is the expected average difference in future progeny performance for preweaning merit. \$W includes both revenue and cost adjustments associated with differences in birth weight, weaning direct growth, maternal milk, and mature cow size.

**Feedlot Value (\$F)**, an index value expressed in dollars per head, is the expected average difference in future progeny performance for postweaning merit compared to progeny of other sires.

**Grid Value (\$G)**, an index value expressed in dollars per head, is the expected average difference in future progeny performance for carcass grid merit compared to progeny of other sires.

**Quality Grade (\$QG)** represents the quality grade segment of the economic advantage found in \$G. \$QG is intended for the specialized user wanting to place more emphasis on improving quality grade. The carcass marbling (Marb) EPD, which is influenced by carcass marbling scores and ultrasound percent intramuscular fat (% IMF) measurements, contribute to \$QG.

**Yield Grade (\$YG)** \$YG represents the yield grade segment of the economic advantage found in \$G. \$YG is intended for the specialized user wanting to place more emphasis on red meat yield. It provides a multi-trait approach to encompass ribeye, fat thickness and weight into an economic value for red meat yield.

\$G combines both \$QG and \$YG, and may be the best carcass decision tool for focusing on quality and red meat yield simultaneously.

**Beef Value (\$B)**, an index value expressed in dollars per head, is the expected average difference in future progeny performance for postweaning and carcass value compared to progeny of other sires.

# A Program and Tag Option to Meet Every Producer's Needs.

The American Angus Association® operates the industry's leading Process Verified Program (PVP) for source- and age-verification. The PVP offers two levels of verification and multiple program compliant tag options.

The premier verification option for producers using registered Angus bulls.

AngusSource verifies

- Source
- Age
- Genetics

AngusSource is the only program to guarantee a minimum of 50% Angus genetics.

**A NEW second tier verification option.**

Gateway verifies

- Source
- Age

Gateway has no genetic requirements.

There is a \$50 fee per enrollment group. Producers must complete training and calf enrollment via phone prior to ordering tags.

***"We like to feed Angus cattle because of the superior genetics. Having that coupled with the verification through AngusSource gives those calves an advantage during their time in the feedlot and when they are marketed. It is a combination that is hard to beat!"***

**Mike & Terry Beller  
Beller Feedlot, Lindsay, Nebraska**

## Why Verify?

### Real World Results

Data collected from Superior Livestock, June-September 2009, indicate that cattle enrolled in age- and source-verified programs received \$1.57 per hundred weight (cwt.) more than calves that were not source- and age-verified. The data also suggested that calves enrolled in AngusSource had a \$1.08-per cwt. advantage over other source- and age-verified programs, bringing the **total value of AngusSource enrollment to \$2.65 per cwt.**

### Marketing Support

**Marketing support.** An online listing site and weekly e-mails expose your cattle to more than 600 individuals who are interested in AngusSource and Gateway cattle. Free with enrollment!

### Destron Fearing Tag Options

Producers may select the tag option to best fit their production and marketing needs:

| Tag Type               | AngusSource | Gateway   |
|------------------------|-------------|-----------|
| Visual                 | \$1.00/hd   | \$2.00/hd |
| RFID-NEW               | \$2.25/hd   | \$3.00/hd |
| Choice-set             | \$3.25/hd   | \$5.00/hd |
| "840" Visual*          | \$1.00/hd   | \$2.00/hd |
| "840" RFID* <b>NEW</b> | \$2.25/hd   | \$3.00/hd |
| "840" Choice-set*      | \$3.25/hd   | \$5.00/hd |

\*Purchase of "840" tags requires a valid premise registration

All visual tags may be custom printed with the producer's management number **free of charge**. Producer's may also custom print the back of the tag with their management number, name and phone number, logo etc. for a one time fee of \$10 and \$0.50/tag. All tags are shipped **free of charge**, UPS ground directly to your door.

For more information or to request an enrollment form contact AngusSource at 816-383-5100 or [angussource@angus.org](mailto:angussource@angus.org) or visit [www.angussource.com](http://www.angussource.com)

**SAV 8180 TRAVELER 004**

*Sire of ALC Steal S27S*

"Steal" was stolen through the Midland Test in 2007 from Assman Land & Cattle, Mission, SD. His sire has led the breed in total annual registrations and has qualified as a Pathfinder Sire. Traveler 004 is a performance and maternal sire. Steal's dam is no slouch either, with the power of his EPDs coming from both sides. These are moderate framed cattle that pass on length, thickness, and muscle yet maintain fertility and milk.

**CONNELLY LEAD ON**

*Paternal Grandsire of Apex Vanguard 136*

"Vanguard 136" is co-owned with Apex Angus, Valier. Out of our 1504 bull and a wide Track 450 daughter. Superb fertility with scrotal EPD of 1.55, calving ease with birth EPD 2.1, ever improving maternal with milk EPD now 27, and excellent growth as seen in the weaning and yearling EPDs. His carcass and \$values are quite promising as well. An all-around herdsire!

"Payweight 654" was purchased in the 2007 Birdtail sale. The cross of the performance sire, Vermilion Payweight J847, and the maternal influence of a Right Time daughter is working well for us. As his data gains higher accuracy, his calving ease is steadily improving, while he maintains good weaning and yearling performance. We especially enjoy the phenotype of his sons ... they're just a pleasure to look at!

"Packer 547" is an AI sire with stunning and balanced EPDs and hence his wide-spread use. In spite of the growth, he has a frame score of 6.4. As described in the 2009 Universal Semen Sire Directory, his bull calves have great growth and his heifer calves are feminine and fertile. Caracass values are good and progeny disposition "laid back".

Lost Lake purchased "Gridiron" from Four Ace Angus of Ft. Ripley, MN. His sire has distinguished himself in all spheres as a herdsire at the TC Ranch. "Gridiron 801" caught our eye as he has it all, pedigree, performance, excellent and balanced EPDs, and good docility. Gridiron's dam is now being flushed as part of the Four Ace ET program.

"Vanguard 1584" is another embryo transplant product of "Lead On" and our top-producing Anne cow. The tradition carries on with top performing sons, and daughters having good fertility, milk, and mothering ability, without sacrificing growth. His numbers only improve with age. Moderate framed cattle, a necessity if your supporting commercial range cows through winter months in Montana.

*Credence meets Lost Lake's criteria for a herd sire ... especially with excellent, balanced, and accurate EPDs. Yes, he had a personal yearling REA of 14.4, ratiing 115 but more importantly has excellent and improving carcass EPDs. He ranks in the top 1% of the breed in three of the four \$Values.*

*"Knockout" was purchased in the Treasure Test Sale from Cash Farms in Centre Hall, PA. All four corners of his pedigree include nationally famous sires, including 7 Pathfinders! If you like "M & M's", you want sons of this sire ... Maternal & Marbling! His numbers are another example of getting better with age.*

*The average weaning weight on Power Point bull calves was 772#. His sire, BR Right Time 338-54, is the #1 proven IMF and maternal calving ease son of Hyline Right Time 338. Also, Power Point's sire was one of the top-gaining and yearling weight bulls at Midland 2005. Power Point's IMF ratio in the Windy Ridge herd was 171%. His dam was the best phenotypically built cow that Windy Ridge has produced.*

*Headquarters — Lost Lake Ranch 2010*

Horizon is a combination of calving ease and carcass merit. He was weaned early due to his 10-year-old dam being lame.

"Fetch" is deep ribbed with lots of beef. Given his growth rates, he should fetch a nice profit for those selling steers out of him.

This commercial bull is big, deep and rugged with lots of beef.

Sitting Bull

## YEARLING BULLS

# READ THIS MANUAL

***Before he goes to pasture***

On the surface, a bull isn't as complicated as the latest electronic gadget, but every year you expect Angus bulls to improve your calves.

Unpack the genetic potential in those bulls with an "owner's manual" of management and marketing tools that will help you get the most out of your new investment.

Updated with EPD recommendations for 2009, the manual is available online at [www.CABpartners.com](http://www.CABpartners.com). For free copies by mail, call 800-225-2333, ext. 298.

# HARRER'S LOST LAKE RANCH

*"In the Real World Sale"*

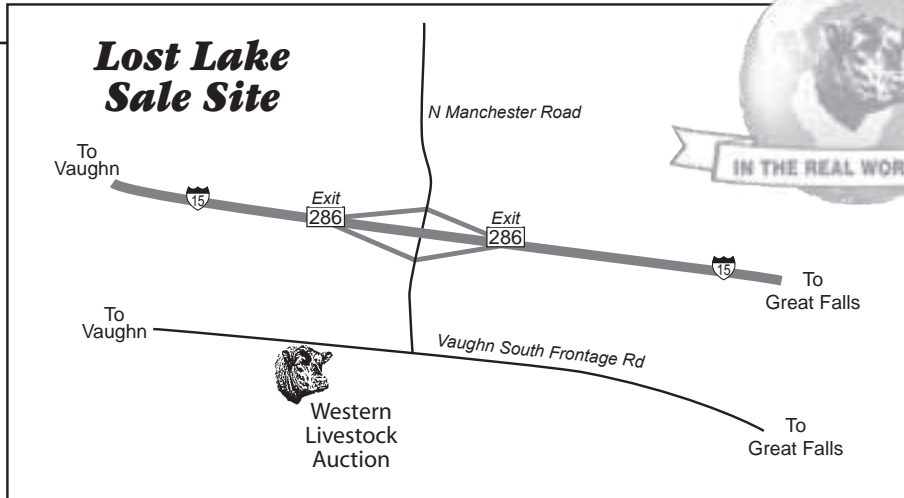

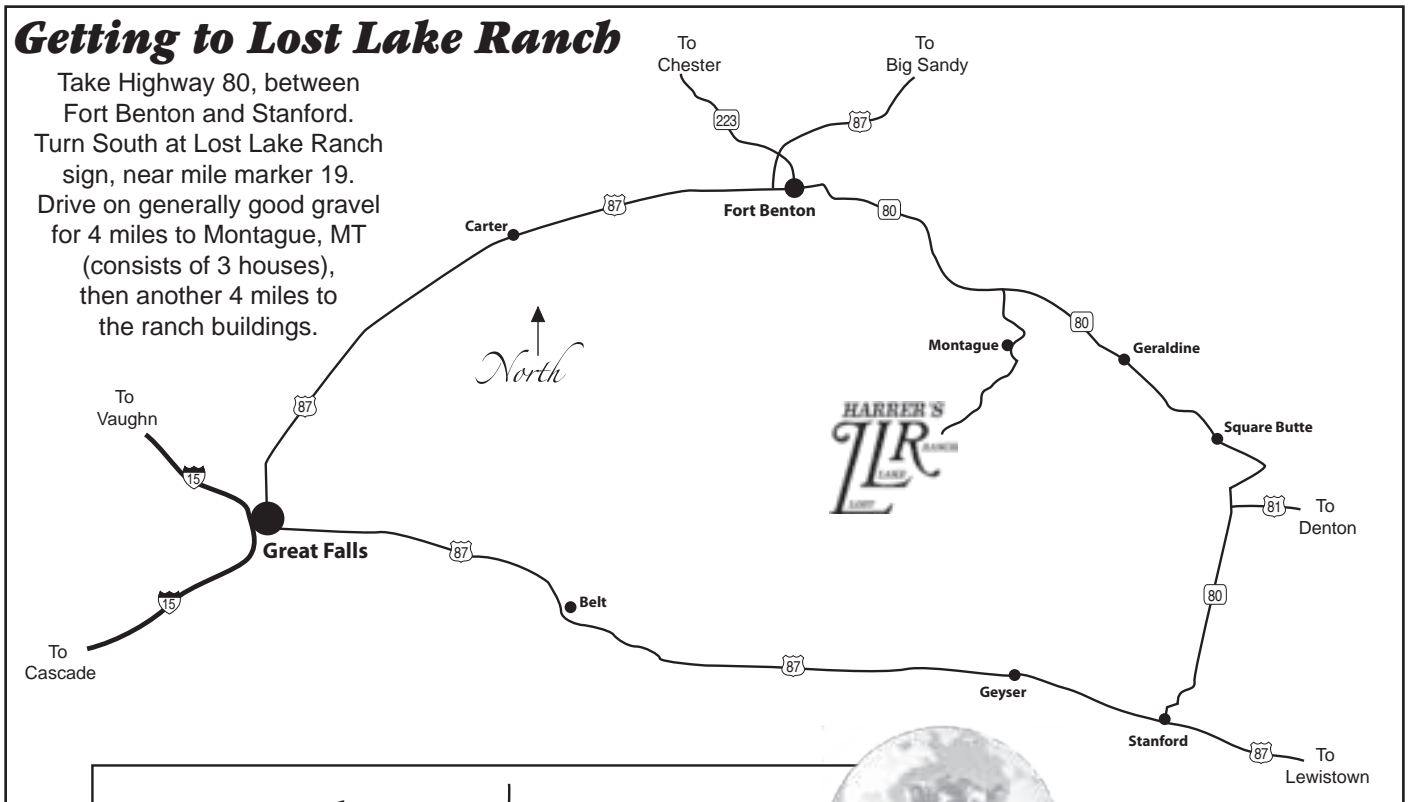

Youth

Experience

## Getting to Lost Lake Ranch

Take Highway 80, between Fort Benton and Stanford.  
 Turn South at Lost Lake Ranch sign, near mile marker 19.  
 Drive on generally good gravel for 4 miles to Montague, MT  
 (consists of 3 houses), then another 4 miles to the ranch buildings.

# *GN* **Notes**

# *GN* **Notes**

# SUGGESTED\* SALE TERMS AND CONDITIONS • AMERICAN ANGUS ASSOCIATION • February 24, 2011

UNLESS OTHERWISE EXPRESSLY STATED IN THESE SALE TERMS AND CONDITIONS OR ANY OTHER WRITTEN AGREEMENT BETWEEN THE PARTIES RELATING TO THE SALE OF ANGUS CATTLE UNDER THESE SALE TERMS AND CONDITIONS, SELLER MAKES NO OTHER WARRANTIES, EXPRESS OR IMPLIED, INCLUDING ANY IMPLIED WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE, EVEN IF SUCH PURPOSE IS KNOWN TO THE PARTIES. THE REMEDIES PROVIDED IN THESE SALE TERMS AND CONDITIONS ARE THE EXCLUSIVE REMEDIES OF THE BUYER, OR ANY PARTY CLAIMING THROUGH THE BUYER, AND UNDER NO CIRCUMSTANCES WILL THE SELLER BE LIABLE FOR ANY INCIDENTAL, INDIRECT, SPECIAL, CONSEQUENTIAL, PUNITIVE OR EXEMPLARY DAMAGES UNDER ANY INDEMNITY PROVISION OR OTHERWISE.

## BIDDING

1. Each animal will be sold to the highest bidder. The person in charge will settle any disputes as to bids, and his decision on such matters will be final.

## ANNOUNCEMENTS

1. If there is any inconsistency in the terms of any sale book, supplement sheet or day-of-sale announcement, (i) the day-of-sale announcement will control over both the supplement sheet and the sale book, and (ii) the supplement sheet will control over the sale book.

## CASH SALE

1. All sales are for cash unless satisfactory credit arrangements, including any possible reservation of security interest by the vendor, have been made with the vendor prior to sale.

## BUYER'S RISK

1. The risk of loss and injury of each animal passes to the buyer as soon as it is sold; but it is the obligation of the seller to ensure that animals are fed and cared for free of charge to the buyer until loaded for shipment or until the expiration of 48 hours after the sale, whichever occurs sooner.

## IDENTIFICATION

1. The seller must ensure that each animal has a readable permanent identification mark (e.g., tattoo, hot-iron brand or freeze brand) corresponding to its registration.
2. The buyer must check all permanent identification marks for accuracy.
3. In those cases where a nickname is used by the seller, the nickname must also be accompanied by the official registered name and number of the animal.

## CERTIFICATE OF REGISTRATION

1. A transferred certificate of registration must be furnished by the seller free of charge to the buyer for each animal within 45 days following the later of the date of sale and receipt of full payment.

## ARTIFICIAL INSEMINATION (AI) SERVICE CERTIFICATES

1. Upon the buyer's request, AI Service Certificates must be furnished by the seller free of charge to the buyer for all females bred artificially to bulls not owned by the seller.

## GUARANTEES

### HEALTH

1. Unless otherwise announced, the seller guarantees that all animals are eligible for interstate shipment as required by federal regulations.

### CONFORMANCE WITH REGISTRATION

1. The seller guarantees that all animals are registered under the rules of the American Angus Association.
2. The seller guarantees to the buyer that all animals conform to the registration certificate as entered in the Herd Book of the American Angus Association.

### PEDIGREE

1. The seller guarantees to the buyer that the pedigree, performance data and individual genetic defect designation of the animal, as represented in any sales materials (including any sale book, supplement sheet or day-of-sale announcement), is accurate.
2. The absence of any such designation on the pedigree of an animal, in a sale book, does not establish that the animal in question is not a carrier of any such genetic defect or genetic factor.
3. In those cases where a commonly understood nickname is used by the seller, the seller guarantees the pedigree of the animal based on the commonly understood nickname.

### SEX

1. Unless otherwise represented by the seller, there are no guarantees that offspring will be of a particular sex.

### BREEDING GUARANTEES

1. The seller guarantees that all bulls are breeders, but only if such bulls are at least 12 months old at the time of sale and have not been allowed to run with the herd until at least 14 months of age. A bull that settles a cow by natural service and passes a fertility test made by competent veterinarians mutually agreed upon by the buyer and the seller, during any six-month period of trial (provided for in paragraph 2 of the section entitled "Options and privileges of return or adjustment") will be considered a breeder. Unless otherwise agreed by the buyer and the seller, the seller makes no guarantees with respect to the ability to freeze semen.
2. The seller guarantees that all animals are breeders, with the exception of: (a) calves under 12 months of age at the time of the sale; (b) animals shown after the sale has occurred (in such cases, the breeding guarantees, if any, will be those guarantees as are agreed upon between the seller and the buyer); (c) injury or disease occurring after the sale; and (d) gross negligence or willful misconduct on the part of the buyer.
3. Cows with calves at their side are presumed to be breeders with no further fertility guarantee.
4. "Safe-in-calf" females are guaranteed by the seller to have been examined by a competent veterinarian and determined to be in calf.
5. "Served" females are not guaranteed to be in calf.
6. "Pasture-bred" females have been exposed but are not guaranteed to be in calf.
7. "Open" females have not been served and are guaranteed by the seller to be without calf.
8. Donor females:
  - a. Unless otherwise agreed by the buyer and the seller, a female that has been used in an embryo transfer program is not guaranteed to be a breeder after the date of the sale.
  - b. Unless otherwise agreed by the buyer and the seller, a female is not guaranteed to be a

breeder after the date of the sale, when that female is to be used, or attempted to be used, in an embryo transfer program.

9. The seller makes the following guarantees with respect to all "pregnant recipients": (i) that the female is pregnant, (ii) that the resulting calf is of the pedigree represented, and (iii) that the resulting calf is of the sex represented (if so represented).

## SEMEN

1. Unless otherwise agreed by the buyer and the seller, with respect to the sale of semen the seller makes no guarantees with respect to the performance or characteristics of such semen and the buyer is purchasing such semen "as is."

## EMBRYOS

Unless otherwise agreed by the buyer and the seller, with respect to the sale of embryos the seller makes no guarantees with respect to the performance or characteristics of such embryos and the buyer is purchasing such embryos "as is."

## OPTIONS AND PRIVILEGES OF RETURN OR ADJUSTMENT

1. Except as provided in paragraph 2 of this section, all claims for adjustment or refund must be made in writing on or before the later of (i) six months after the sale date and (ii) the date on which the animal reaches 30 months of age.
  2. All claims relating to the misrepresentation of service sire and all claims relating to paragraphs 9 and 10 of this section must be made in writing on or before the second anniversary of the date of sale.
  3. If an animal is claimed to be a non-breeder, the animal may be returned to the seller in good condition and complying with the health requirements of the seller's state. The seller is entitled to six months trial following the return of the animal in which to prove that the animal is a breeder. If at the end of the six-month period the seller is unable to prove the animal is a breeder, the seller must, at the option of the buyer, replace the animal with another of equal value or refund the purchase price. The return of the full purchase price will be deemed full satisfaction and settlement. Any expense incurred for transporting an animal claimed to be a non-breeder will be the responsibility of the buyer, except that the seller will be responsible for transportation costs in excess of the distance between the buyer's farm and the location where the sale took place. If the seller proves the animal to be a breeder, it will be the obligation of the buyer to take delivery of the animal and pay all transportation expenses.
  4. If a female sold as "safe in calf" proves not to be in calf, the buyer may receive service from the bull previously used, if available. If the bull is not available, the seller must make a satisfactory adjustment on the purchase price to the buyer or, at the buyer's option, refund the purchase price upon return of the animal to the farm of the seller. Any adjustment provided for in this paragraph will absolve the seller from further liability, except in if such female proves to be a non-breeder. If a female represented as "safe in calf" to a certain bull at the time of sale proves to have been bred to a different bull, the seller must make a satisfactory adjustment on the purchase price to the buyer or, at the buyer's option, refund the purchase price upon return of the animal to the farm of the seller (adjustments will not be considered to be a breeding fee or an allocation of the purchase price to any unborn calf).
  5. If a female sold as "open" proves to be with calf, the buyer may return the animal to the farm of the seller prior to calving for a refund of the full purchase price or for another animal of equal value, whichever is acceptable to the buyer. The Seller is responsible for all transportation expenses.
  6. White skin or hair must not be painted or altered. If such painting or alteration has occurred, the buyer may return the animal to the farm of the seller for a refund of the full purchase price or for another animal of equal value, whichever is acceptable to the buyer.
  7. If an animal (including the offspring of a pregnant recipient) is sold and at a later date proves not to have been eligible for registration under the rules of the American Angus Association, the seller must make a satisfactory adjustment on the purchase price to the buyer, or at the option of the buyer, refund the purchase price upon the return of the animal to the farm of the seller.
  8. If (i) an animal is sold (including the offspring of a pregnant recipient) and through DNA-markertyping is proven to have incorrect parentage, as represented by the certificate of registration, and for which parentage can be determined, or (ii) the resulting calf of a pregnant recipient is not of the sex represented, the seller is obligated to make a satisfactory adjustment on the purchase price to the buyer or, at the buyer's option, refund the purchase price upon the return of the animal to the farm of the seller.
  9. Except as provided in paragraphs 3 and 5 of this section, all transportation expenses incurred will be the responsibility of the buyer, except that the seller will be responsible for transportation costs in excess of the distance between the buyer's farm and the location where the sale took place.
- ## RETENTION OF GENETIC MATERIAL
1. Unless otherwise agreed in writing by the seller and the buyer, the seller will not retain any genetic material of any animal (including embryos and semen) for the purpose of cloning.
- ## DISCLOSURE OF TESTS RESULTS FOR KNOWN GENETIC DEFECTS AND FACTORS
- The seller shall have an affirmative duty to notify the buyer of any test results for genetic defects or genetic factors not otherwise reflected on an animal's pedigree.
- ## OPTIONAL GUARANTEE: GENETIC DEFECTS
1. The buyer and seller may determine the scope and duration of a guarantee, if any, on an individual basis. The seller may, but is not required, to provide a guarantee to the buyer relating to genetic defects.
  2. Nothing contained herein should be construed to relieve the parties from complying fully with all the rules and policies of the Association relating to genetic defects generally or individually.
- ## Miscellaneous
1. The above terms and conditions of sale constitute a contract between the buyer and the seller of each animal and are equally binding upon both parties. Each sale or resale of an animal constitutes a separate transaction.
  2. Neither the sponsor or sponsors, the sale manager, nor any other person connected with the management of the sale, assumes any liability, legal or otherwise.
  3. These sale terms and conditions and all rights, obligations and duties arising hereunder and all disputes arising hereunder will be construed in accordance with, and governed by, the laws of the state in which the sale of the animal or animals occurs, without giving effect to such state's choice of law rules.

\* For voluntary consideration and use by sellers in their independent business judgment.
