

FAIRVIEW
ANGUS RANCH

MELVILLE, MONTANA

SPRING 2012

PRIVATE
TREATY
BULL SALE

Welcome to the 2012 FairView Ranch private treaty bull sale. We are a summer/fall calving program with heavy emphasis on forage conversion. The bulls in this offering were born in the fall of 2010 and weaned at 6 months of age, and fed only ground hay and lick tubes through the winter. They were turned out on grass from June 1 to December 1, where we measured growth and do ability. After, the 1st of December the bulls were brought back in and fed ground hay and a small protein supplement. The bulls will be in good shape to go cover cows, not fat. FairView bulls are fed a total forage ration just like what you would feed them, allowing us to offer you bulls that will convert forage. Commercial cattle make money by converting grass to red meat. These are bulls for commercial cattlemen to turn out and breed cows, not bulls we're getting ready to slaughter.

To us the cow herd is the most important asset to any ranch. If you match your cowherd to your environment, you'll discover there are not many ranches in Montana that can sustain an 1,800 pound cow. Bulls with huge growth EPD's will create inefficient, hard fleshing, monstrous cows. As a general rule, increasing growth also increases mature cow size and decreases fleshing ability, simply breeding the function right out of your cow herd. There have been numerous commercial cattlemen that have stated to me over the year "I sure wish I could still find those real good Angus heifers that had the longevity, fertility, and efficiency that I was used to." "These terminal high growth females are costing me a lot of money." Here at FairView our goal is to bring you the longevity, fertility, and efficiency you are looking for.

Producers in every sector of the cattle industry are facing rising cost, but none impact the bottom line more than the cost of feed. To maintain profitability, producers must be able to identify genetic lines that provide the most efficient animal as possible. 70% of the cost of carrying cattle is the cost of feed and pasture, feed efficiency has become the driving force in the beef industry. We bring you those animals that will survive on low inputs in a totally forage based environment and be able to go into a breeding season and come out still maintaining their flesh. The bulls represent form and function for optimum levels of growth without high inputs. It has been proven that feed efficiency pays twice the return of carcass traits and cow herd efficiency pays back twice the return of feed efficiency. Therefore, cow herd efficiency traits pay you 4 times the return as cow/calf producers as terminal carcass traits. This is not to say we don't look at and select for carcass ability within, however we believe there needs to be a balance to maintain and sustain a cow herd that will pay dividends year in and year out. We believe it all starts with the mother cow and encourage anyone to come and see the mothers of the bulls for sale. We continue to use embryo transfer heavily to push our program to where we want to be genetically and to be able to offer flush brothers that will put consistency into your herd.

The FairView program will continue to be based with the commercial cattleman at its core. Come and see what our program is about. We look forward to having a production sale again here at the ranch next February and are awfully excited about the calves that will be showcased at that sale. We will continue to have a group of bulls that we sell private treaty year after year, as we have had very positive interest. Thanks for taking the time to review our catalog. These bulls are available for viewing here at the ranch and you are welcome at any time. Remember profit has little to do with what you receive and a lot to do with what it costs to get there.

Sincerely,

George and Judy Frank
Kenny and Rachael Lee
