WELCOME

"We can make our plans, but the final outcome is in God's hands"

- Proverbs 16:1

307/ 850-2514 • 307/ 850-2053

Box 6 • Boulder, WY 82923
Box 1445 • Riverton, WY 82501

Greetings Cattlemen,

Welcome to our 13th annual "Cowboy Bulls" production sale. Wow, what a year! Last year we thought the cattle industry couldn't get any better. The prices are up 20-25% since then. Grass calves are bringing \$1100/head plus, and some bred cows have topped \$2000/head. Where will it end? Experts are predicting 2-5 more great years. But, it will end some day. The most important questions are; How much profit will your ranch capture? And how will you use the profits to put your ranch in a better position for the future? Feed efficient, durable genetics is the best way to make both outcomes positive for your operation. Feed efficiency, or the ability to convert feed to pounds, will always be the biggest economic indicator on your ranch. Just in front of sickness and death loss.

March 10th, Lucky 7 Angus will be offering bulls whose genetics are arguably the best in the world when it comes to feed efficiency, not only claimed but tested. Lucky 7 cows are feed efficiency tested 9 months of the year by limiting the amount of feed /energy/nutrition. A state of the art, GrowSafe feed efficiency test system is owned and used to further test our genetics. The results are astounding! It appears as though our entire cow herd is in the top 20-30% feed efficiency for the Angus breed. Lucky 7 Angus 1st calf heifers are able to pasture on 3-4% protein swamp grass until December 30th. Then, be fed a 13.7#/day all roughage ration through February while maintaining a body condition score of 4 and better. All in one of the nation's harshest environments. Although it sounds unreal, these same results are being seen by other cattlemen using Lucky 7 bulls.

Even more profits can be achieved by PAP testing, which is directly related to respiratory issues that cause sickness and death loss. At Lucky 7 Angus you will be buying from a true high elevation program. The bulls in this sale have been PAP tested at 7160' by Dr. Tim Holt after 4 month exposure to this elevation. The cows run on pastures up to 38,000 acres, and heifers summer at elevations above 10,000'. While the bulls are grown out on 10,000 acre pastures at 7200'. All of our cows are above 7000' for 8 months of the year, including a high stress period. We're not just selling PAP tested bulls, Lucky 7 Angus is serious about raising bulls for the high elevation rancher. (It is sad that other breeders use the PAP test as just a gimmick to sell bulls.)

All bulls selling for \$2500 and more carry the "nation's only 4 year guarantee". We expect the bulls in this offering to increase your ranches profitability.

Our warmest welcome goes out to you and your families. If we can be of assistance, please feel free to ask for our help.

Thank you and may God Bless you,

Lucky 7 Angus

The Jensen's (Jim, Jamie, Kay, Desi, J.W., Ethan, Bodie, & Jessie James)

The Crew (Johnny, Laurie, Destry, Talynn & Duke Schmidt)

The Strajduhar Family (Steve, Delayne, Robert, Taylor, CharLee, Sterling & Garrett)

LUCKY 7 ANGUS

Where tougher conditions, and higher testing standards make better bulls!!!

This catalog is proudly produced in America and printed on American made paper.

13th Annual

"Cowboy Bulls" Production Sale

Saturday, March 10, 2012

Riverton Livestock Auction, Riverton, Wyoming

12:30 pm • Lunch at 11:30 am

— **SELLING** —

265 Two-Year-Old PAP Tested Angus Bulls
55 Yearling Angus Bulls
41 Quality Ranch Horse

Adam Redland, *WY Livestock Roundup* ... 307/250-1548

SALE TIME AND LOCATION

12:30 pm at Riverton Livestock Auction, Riverton, WY

INSPECTION

Cattle are available any time at the ranch and will be at the Riverton Livestock Auction March 9, 2012.

ACCOMMODATIONS

Sundowner Motel, 307/ 856-6503 or 1-800-874-1116.
Sale headquarters. Ask for Lucky 7 Angus rates.

TERMS & CONDITIONS

CASH. Cattle sell under the Terms and Conditions of the American Angus Association.

LUCKY 7 BULL GUARANTEE

See our bull guarantee program on page 39.

DELIVERY

Free delivery first 300 miles on purchases of \$3,000 or more. All other delivery at cost.

References: American Angus Association®, AHIR®, Angus Source®, CAB®, Pathfinder®.
EPDs current as of February 3, 2012. Updated EPDs can be viewed at www.angus.org.

FERTILITY

All bulls will be fertility tested within 2 weeks prior to sale by Dr. Mark Washenfelder, DVM. This will guarantee all bulls selling to be Fertile and satisfactory breeders at time of sale. (Some breeders do not have bulls fertility tested before the sale, but it is mandatory at Lucky 7 Angus to meet our high standards.)

SIGHT UNSEEN PURCHASE GUARANTEE

Buyers unable to attend the sale may call or send their bids to any of the representatives listed above. All cattle come with a Satisfaction Guarantee.

PAP TESTING

All PAP scores are taken at 7,160 feet after a minimum of 4 months at that elevation, by Dr. Tim Holt. For further PAP information, see page 40.

BULLS SELL IN WORKING CLOTHES

The bulls in this sale have been on a high roughage low energy ration. They will not be as fat as at most sales. Overfeeding bulls causes permanent fertility problems. Bulls fed as these are will simply breed more cows.

ULTRASOUND AND CARCASS DATA

Ultrasound carcass and fertility test information will be available at the sale.

FEED EFFICIENCY

Only half of the 2yr old bulls in the sale went through the GrowSafe test system. Of the bulls tested, the top 50% will be shown under their footnotes, see more feed efficiency on page 4.

WATCH AND BID AT HOME ON THE INTERNET!

Simply visit www.cattleusa.com. Please pre-register early. Call 307/ 856-2209 if you have trouble getting approved.

FEED EFFICIENCY

Cattle Feed efficiency on a ranch is, and always will be, its biggest economic indicator. By purchasing a state of the art GrowSafe test system, we are able to locate the most efficient animals. The data will get calculated into an RFI (Residual Feed Intake) score. The lower the RFI(Negative), the better the feed efficiency. This data is substantiating that our cow herd is in the top 20-30% of the breed for feed efficiency. By limiting the feed to the cattle for 9 months of the year, natural selection has culled the inefficient ones. Now with this GrowSafe system we are able to locate and propagate the most efficient.

We always thought that our high elevation was the reason 70-80% of all cows purchased could not raise calves or breed back when taken to our ranch. But, this theory went out the window when we purchased several of the Shamrock Angus cows. These cattle were clearly high elevation, but, still 70% could not handle our conditions and were culled. Why? Feed Efficiency. Using the GrowSafe data we are finding that the cows that come up open are usually less feed efficient.

More efficient animals will not only save you money on the ranch (\$60-70 per cow/year or more), but will also demand a premium when sold. Do the math; If a 5-6 weight calf is 30% more efficient? It will equate to \$117/head bigger profit at the feedlot with today's costs. Or, 23.4 cents per pound more they can pay for your calves.

Our GrowSafe Feed Efficiency Testing System, one of the only owned by a purebred breeder in the U.S.

LUCKY 7 ANGUS "NO BULL SHIT" 4 YEAR GUARANTEE

All bulls selling over \$2500 in the March 10, 2012 sale will be guaranteed against injury that renders them incapable of breeding, or to be a potential breeder except those specifically listed below. How much more could you pay for a bull knowing he would last 4 years? And how much better could you manage your budget and your genetics? Knowing the average longevity of bulls from most breeders, this could easily be worth \$1500/bull or more. As the industry leader, breeding and raising bulls capable of holding up, lasting longer and taking tougher conditions, it is fitting that Lucky 7 Angus is the first to raise the bar and offer a 4 year guarantee. We hope that others who claim to have bulls which can do the same will step up to the plate.

This guarantee only applies to original purchaser and shall not apply to any bull which has not been maintained by original purchaser at all times and for normal breeding practices and in normal breeding conditions. This guarantee only applies to bulls which are maintained at all times in accordance with rules and practices of good animal husbandry and management.

Claims shall be resolved as follows: Bulls purchase price up to \$8500 less salvage value shall be credited to the purchaser toward purchase of (1) bull at following Lucky 7 Angus Bull sale. The credited purchase price decreases by 25% per year, after turn out to cows, or July 1st, whichever is earlier. All Credits due must be used In first proceeding Lucky 7 Angus bull sale following injury, or will become void. Original purchaser must contact Lucky 7 Angus within 14 days of discovery of injury and have licensed veterinarian's verification. Lucky 7 Angus retains the right to use an agent of their choice for all verifications. If any claims are denied by Lucky 7 Angus, purchaser must respond with written legal explanation describing why guarantee should apply, or lose any guarantee available on bulls.

Exceptions: injuries or loss caused by motor vehicles, equipment, or trains; injury or loss caused by acts of nature/God including but not limited to: lightning, tornadoes, blizzards, freezing cold, fires, drowning; injury or loss from disease, feed intake or poisoning, any human caused injury or loss, including but not limited to: nuclear, radioactive, contamination, war, invasion, acts of terrorism; confiscation, quarantine, theft; malicious or willful injury to animal, injury or loss caused by carelessness, neglect; failure to maintain good animal husbandry and management; any injury or loss caused by predation.

HIGH ELEVATION AND PAP TESTING

PAP testing is a great tool for cattlemen running cattle at elevations above 6000 feet to help control a condition known as Brisket Disease (Dropsy or High Mountain Disease). Brisket Disease is one of the Rocky Mountain Region's most costly diseases, with instances of up to a 30% death loss. In order to effectively reduce the instance of Brisket, bulls should be PAP tested above 6800' and out of cow herd ran above 6800' throughout a high stress period. (ie. Late fall and or early winter)

Three things you must know to evaluate a PAP score

- 1) Elevation of test.** PAP tests performed at 6800 feet and above will accurately predict which cattle can survive at higher elevations. Tests below 6800 feet will only predict which cattle are O.K. at lower elevations.
- 2) How long at elevation prior to test.** Cattle must be at elevation of PAP test for a minimum of 21 days. The longer the better.
- 3) Vet performing test.** PAP testing is a very intricate procedure. The accuracy of the test is only as good as the technician and his equipment. We would advise technicians be trained by or approved by Dr. Tim Holt, DVM, the master of PAP testing and Brisket Disease.

PAP Testing Recommendations Lucky 7 Angus bulls are PAP tested at 7,160ft after being at this elevation more than 4 months, by Dr. Tim Holt DVM. Each producer needs to evaluate their own operations in order for proper selection of PAP tested bulls. The following is our recommendation. These recommendations must be applied in order to qualify for compensation of our 4 year guarantee. All bulls in this sale will work for breeders up to 6,000 feet. Producers in elevations from 6000- 7200 feet, or producers going up to 8500 feet for short grazing periods in the summer, 44mmhg and below. Producers in higher elevations than these, 41mmhg and below. **The PAP test is the best tool currently available for identifying animals predisposed to Brisket Disease. However, it is not 100% and should not be used as such.**

Dr. Tim Holt PAP Testing

The yearlings are all born out of first calf heifers except lots 274, 290, 296, 297 and 316

This bull is one of the most feed efficient bulls to ever go through the Midland Bull Test system. He had a RFI of -7.97. His paternal brothers, as a sire group shattered all records, 5 bulls with a combined average of -3.06 RFI and an average ratio of 113. He is good footed, travels well, and gained weight while breeding a lot of heifers as a yearling. Combine that with his PAP score of 37 at 7160' and you can see why we are so excited about him.

Kat is a six year old registered bay mare. Gentle, quiet and has always been a willing and dependable ranch horse. Started as a three year old and has been handled the right way. I work at Dunmire Ranch, near McFadden and she has put in many miles between the cow calf ranches and yearling operation. She has drug calves to the fire, doctored yearlings, sorted hot cows during Al'ing, calved on, and made many many big circles. While being very gentle this mare has a lot of bottom and will carry you all day long. The ranch summers these good Lucky 7 Angus Yearling Bulls and this little mare has no problem handling the rope with those big bulls on the other end. She has never offered to buck, and is the same horse the first day of spring as she was the last day of fall work. Very good on her feet and has a very soft handle. She is good to shoe and haul. This is a nice mare that would fit into any operation. Call Tim Cooper 307-703-5978.

Kat
