Hansen Registered Angus Ranch • Froid, MT

Sale begins at 1:00 PM • Mountain Standard Time

Lunch served at Noon

March 16, 2021

Lunch at noon. Auction at 1:00 pm MST

Sale Day Phone Numbers

406.963.2239 (house)

406.963.7239 (Rick's Cell Phone)

Open House Sale Preview

At the Ranch on March 16, 2021. Lunch will be served at noon, the Auction starts at 1:00 pm. The bulls can be inspected at any time prior to the sale by contacting Rick or Lanette.

Retained Interest

Hansen Registered Angus is retaining 1/3 revenue sharing interest in all the bulls selling. Full salvage value belongs to the buyer. Should we, the seller, wish to collect semen on any of the bulls it would be at the seller's expense and the buyer's convenience.

Health

At Branding (2-3 months of age): Vision 7, Bovashield, Injectable Dectomax

Pre-Weaning: Vision 7 Somunus, EXPRESS 5 PHM, Multimin

Weaning: Vision 7 Somunus, Inforce 3 Nasalgen, Ivomec Pour on, Pyramid 5 Presponse

Bulls will be poured with Ivomec and vaccinated with Virashield 6 prior to delivery.

Volume Discount

We will give a 3% discount on 3 bulls, 4% discount on 4 bulls or 5% discount on purchases of 5 or more bulls by the same buyer. Volume discount applies only to bulls purchased on opening day.

Scrotals & Current Weights

One week prior to the sale Actual Scrotal Measurements and current weights on the sale bulls can be found on our website, www.hansenregisteredangus.com on the "Sale Info" page and will also be available sale day at the ranch.

Terms

Payment will be due to Hansen Registered Angus on the date of sale unless other payment arrangements are made.

Delivery

Bulls will be delivered beginning June 1st, unless the buyer requests that a bull be delivered earlier. Free delivery up to 500 miles. Over 500 miles at cost. Registration papers and Semen Evaluation Test results will accompany the bulls at delivery.

Guarantee

ONLY bulls purchased on March 16th, 2021, at our opening day auction are guaranteed against any injury that would keep them from being a breeder for the first breeding season. If a problem occurs, please contact us immediately. A suitable replacement (if available) will be provided OR a credit minus a salvage value of not less than \$2000 will be given toward next year's sale. The buyer will choose the preferred option. The guarantee does not cover the death of the bull or any treatable condition, such as foot rot, pinkeye, etc. **All claims must be made by September 1, 2021. This guarantee will end as of September 1, 2021.** We reserve the right to have a veterinarian of our choosing inspect the bull in case of injury.

Cattlemen,

Welcome to our 2021 Spring Bull Sale to be held at the ranch March 16th, starting at 1:00 MST. The bulls will be available for inspection any time prior to March 16th up until sale time. Lunch will be served at noon lower left-hand corner of his lot information.

We are offering 37 lots for sale this year that represent the top 40% of the bulls born in 2020. We had an abnormally high percentage of heifer calves born in 2020; hence, we are selling fewer bulls than in past years. The bulls have been fed a ration of 1 pound of CHS High Energy Bull Challenger per 100 lbs. of body weight, along with 2 lbs. of DDG per head, per day. Long stem grass hay is available to them free choice. A mineral package is blended in with the pellets and DDG. While aiming at an A.D.G. of 2.75 to 3.00 lbs. may not maximize their gain potential, we feel that "fattening" a breeding animal is senseless and counterproductive.

Those of you that have followed our breeding program know that we are not using E.P.D.'s as the "be all, end all" criteria in our decision process. We base our breeding program on the basic principles of sound structure and the maternal traits of fertility, udder structure, good feet and quiet dispositions. We feel these are the traits that lead to longevity, which has become the forgotten economic trait most related to profit. The influence of proven cow families in our herd bull battery will remain the guiding direction in our breeding program. The limitations of our environment and feed sources have dictated the "type and kind" of cattle we strive to produce. We do not use sires who have genetic defect carriers in their pedigrees regardless if they have been tested defect free.

As we have done in years past, the sale will begin at 1:00 PM, and bulls will be sold in catalog order, beginning with Lot 1. Bid increments of \$250 will be used. Any bull not purchased during the auction will be offered on a first come-first served basis beginning on March 23rd. Bulls will not be sold for less than the opening bid price in this catalog.

Should you have any questions about the sale offering or our breeding program or would like to see the bulls prior to sale day, please call us anytime. Our phone numbers are listed throughout the catalog. We appreciate your interest in and support of our breeding program and look forward to seeing you on sale day. If you can't be here for the sale, you can leave your bid with us and we will implement it as you direct us to.

www.hansenregisteredangus.com

Hansen Registered Angus is located in the northeastern corner of Montana, about 7 miles west of the Montana/ North Dakota state line and approximately 50 miles south of the U.S./ Canadian border.

My wife, Lanette, and I own and operate the ranch where I was born and raised. We have three children: Paul and his wife, Megan and their daughter, Molly and son, Oscar; Eric and his wife Cecilia and their children, Caleb, Eli, Gabby, Avery, Lucia, Tessa, and Bernadette; and Beth and her husband, Brendan and their son, Lucas and daughter, Grae.

We purchased our first registered Angus cattle in 1982 and have been raising Angus ever since. Long, harsh winters and short growing seasons with limited rainfall have shaped our breeding philosophy. Winter feed is our main expense and while the majority of it is raised on the ranch, supply often dictates that we purchase hay and/or supplements. Grazing consists of primarily native grass while most of our tillable ground is used as hay land or seeded to tame grass varieties for early and late season grazing.

In addition to our Registered herd, we, along with Paul and Megan, also run commercial cattle. We A.I. both herds and have enhanced our genetics through the use of our embryo transplant program.

We focus our emphasis on the Angus cow, hence our motto: "Sound Proven Maternal Genetics." We always look forward to visiting with fellow Angus producers, and encourage you to call us at 406.963.2239, email us 2rhansen@nemont.net, and visit our website at www.hansenregisteredangus.com.

Directions to the Ranch:

From Froid, MT: Head East through Froid on Hwy 405 for 13 1/2 miles (pavement will end after 9 miles). Turn North just past the Hansen Registered Angus sign.

Head North for 2 miles; our house is on the west side of the road.

— Breeding Philosophy —

To Lanette and me, the survival of the Angus Breed is based on what made it as prominent as it is today: Angus Cow. So when we say, “Sound, Proven, Maternal Genetics” this is what we are referring to.

SOUND: By this, we mean structurally correct. I think it speaks volumes that no one has come up with an E.P.D. for structural soundness. I believe it is the first and most essential consideration in a breeding program. Interestingly, structural correctness can only be evaluated by a good eye for it--not by some quantifiable number. We evaluate soundness by some basic optics: Level top lines with a tail head pointing at the horizon, not the moon. Feet and legs that point the same way as the cow faces with ample room between them, giving her the capacity to convert forage to sustain her in harsh environments. An udder with a level floor, strong center support and high tight attachment and teats about the size of your thumb that are evenly placed on the udder floor. She is wedge shaped, wider through her hips than her shoulders while still maintaining what we refer to as “base width,” or a wide chest floor and smooth shoulders. Feminine necked and a wide muzzle for grazing also are important characteristics when we evaluate our females. We do not hesitate to cull those cows that do not adhere to these criteria. It is evident to us that the cows that possess these characteristics are more fertile and thereby lend themselves to another trait that is as important to profitability as any, that being longevity. Research has shown that a cow, on average, is not profitable until she is 4 to 5 years of age. Culling her at a young age because she didn't breed or has broken down structurally from bad feet, a bad udder or is stifled from bad leg structure is costly no matter what her E.P.D's are.

PROVEN: Given that we measure a bull by the daughters he leaves us, we are prone to use genetics that have withstood the test of time. The vast amount of our pedigrees include the following bloodlines, most often close up in their pedigree:

- “Rito” through FO203 and Rito 149
- “Wye” through Viking GD60, Shoshone Vantage, Forever of Wye, Commodore of Wye and Fabron of Wye.
- “Emulous” through Emulation 31 bloodlines and P.S. Power Play and “Bandolier” through Band 105 and Traveler 23-4.

We do not use Sires or Dams with genetic defect carriers in their pedigrees regardless if they have been DNA tested free or not.

MATERNAL: While quite often maternal is used in general terms, to us it means calving unassisted, promptly getting up to dry her calf off and getting the calf up to nurse. Perhaps maternal can best be described as mothering ability. Her disposition should be such that she is attentive to her calf without being hostile or a threat to us. While maternal is often associated to mean milk production, we believe, as stated before, that without sound functional udder structure the level of milk she produces is irrelevant. Finding the balance between adequate milk production to raise a good, healthy calf and udder structure that enhances her longevity is what we strive for.

As you have probably ascertained by now, we are not a breed by the numbers producer of seedstock. Our environment and resources dictate the type of cattle that are the most profitable. I couldn't look at a bull or cow and tell you what frame size they are and I'm damn sure not going to start carrying a tape measure around to find out. All I know is I don't like them small and I don't like them tall and hard doing. Logically, it would seem that length, depth and thickness dictate weight and that is the visual measurement I go by. If pressed, I would describe our cattle as being the “big side of the middle of the road” when it comes to frame.

106 is a son of the 8296 Bull listed on our website. His dam is a daughter of Stevenson Rolling Thunder. 106 sires less birthweight and a little more frame and growth than his sire who we also think very highly of. We have calved two sets of his daughters, and to say that we like what we see to this point would be an understatement. They are long bodied, deep ribbed with a deep flank all while displaying long feminine necks and keen sharp heads. His sons show abundant growth while maintaining the thickness and mass of their sire. 106 was bred by Zane Panasuk, Culbertson, MT. He is co-owned with Zane Panasuk, Dietz Angus of Sentinel Butte ND, and Jeff Younkin of Hamilton, MT.

518 is a home-raised bull that is linebred to EXT. He is one of four flush brothers that we used on both our registered and commercial cows. 518 posted an average nursing ratio of 104 on 58 calves. They have moderate birth weights, are long bodied and extremely correct. 518's dam is a Great Plains daughter that we flushed extensively. Her progeny consistently rise to the top for production and possess the phenotype we strive to produce.

	H 96 Bluebird Lass 4912		

558 has become the heir apparent to his sire who was used here for 10 years as a calving-ease sire. 558 is a calving ease bull as well and sires the same thickness and body type as his sire. The dam of 558 is also a daughter of CH Quatum 3330 making 558 a half-brother, half-sister mating. We flushed the dam of 558 and have used her genetics in both our registered and commercial herds. The first daughters of 558 that we have calved are exactly the type of females we strive to produce. If you are looking for bulls to use on heifers don't overlook the sons of 558. 558 records a progeny birthweight ratio of 98 on 113 calves and a progeny weaning weight ratio of 101 on 108 calves.

	YA Black Belle 360		

638 is a bull we purchased from Bob and Sally Yadon at Manhattan, MT. 638 is sired by 330 who is a bull we raised and sold to Zane Panasuk and the Yadons. 638's dam is a granddaughter of Image-Maker and out of the 505 Great Plains daughter who has had a major impact on our breeding program. 505 is also the dam of many ET daughters in our herd as well as HRA XXP 518 who has sons in this sale. 638 is extremely thick and deep with perfect feet, traits which he passes on to his progeny. The more we see of 638 progeny the more we like them and we think you will like them as well. Unfortunately, we lost 638 to an injury in the breeding pasture. "638" is co-owned with Yadon Angus and Steve Wyse of Manhattan, MT.

Linebred is a sure-fire calving ease sire that we have used for the past several years. He consistently sires light birth weights and his calves at birth are up and sucking in a flash. We have calved quite a few of his daughters and they are the kind that are going to stay in the herd to 10 years of age and beyond. Here again, if you are looking for bulls to use on heifers, don't miss out on these Linebred sons. This will be our last set of calves out of Linebred as we are out of semen. We plan on using one of his sons that was purchased by Medalen Angus at Towner, North Dakota. This bull is an own son of our foundation (34) cow.

676 is another home raised bull that we used cleanup after AI, who is sired by 5000. 676's dam is an eleven-year-old cow who has left us with replacement heifers that are doing a good job replicating the sound physical and udder structure that lends itself to the longevity that she displays. 676 sires light birthweights and will add base width and thickness to virtually anything he is bred to. If you are looking to add easy doing traits and fleshing ability to your herd, give these 676 sons a look. 676 exemplifies the proven maternal genetics that the Angus breed is (or was) known for.

791 was purchased from J Bob Hould at Havre, MT in his 2018 bull sale. 791 has been used as a cleanup bull on our yearling heifers after AI and did a wonderful job. He is a calving ease bull who is very consistent in the birthweight and type he sires. If you will look at his pedigree you will notice that both the dam of his sire and mother is the same cow. She is the foundation of JBob's herd as he has numerous daughters of her and has used many of her sons as well. Additionally, 791's grandsire is also the grandsire to the sire of his dam. (Notice a pattern in our genetic selection process here?) Co-owned with J Bob Hould at Havre, MT.

Profile is a home raised bull who we kept to carry on the genetic influence of our old "Rito Band 5000" bull, a bull who stamped his calves with the physical traits we strive to produce. Profile's Dam is a herd bull producing cow who also has a son working at Randy Morested's at Fordville, ND. Profile's dam is also the mother of the "pick of the herd" replacement heifer calf that sold to Wes Elston at Spiritwood, ND in our 2018 sale. The Profile calves born here have very moderate birth weights, and a very attractive phenotype. Those who have seen Profile comment on the natural thickness and depth of rib he displays along with his sound foot and leg structure and large scrotal. We think you will like his sons in this sale.

5107 was purchased from Spring Valley Ranch in South Dakota. Given the affinity I have for proven maternal foundation genetics, I couldn't pass up on the chance to own this bull. A son of RR RITO 707, who has had as much if not more influence on the Angus breed than any bull in its history, 5107's foundation bloodlines don't stop there. His dam is an own daughter of Shoshone Viking GD 60. Her dam is a daughter of Band 105 (who is also the sire of QAS TRAVELER 23-4) who is in turn a daughter of RITO 149, who is sired by none other than RR RITO 707. 5107 is a thick, moderate framed bull with perfect feet and excellent structural correctness. 5107 is co-owned with Littau Angus Ranch of Carter, South Dakota.

We used 6141 as an AI sire to introduce the Shoshone Influence more prominently into our herd. 6141 is widely known as a very strong maternal sire whose progeny are very fertile with high-end libido. His bull calves here have performed well at weaning and on feed. His heifer calves are feminine, wedge shaped and have the distinct phenotype of the Shoshone Viking bloodlines. We will be keeping one of his sons to use back on our registered cows.
